DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1-4 and 6 rejected under 35 U.S.C. 102(b) as being anticipated by German Patent No. DE19956830 to Gottlieb et al.
- 3. As per claims 1-4, Gottlieb et al discloses (See Figure 9) a fuel injection valve having a nozzle needle (2) inserted into a guide hole (not numbered), where the nozzle need and the guide hole form a gap(H) that has a tapered shape that widens towards the nozzle holder (1) of the valve.
- 4. As per claims 2 -4 the entire gap has a linear tapered shape that widens towards the nozzle holder (1)/
- 5. As per claim 6, the gape has a tapered shape as a result of a tapered portion (3) formed on the nozzle needle.

Claim Rejections - 35 USC § 103

- 6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Application/Control Number: 10/572,550 Page 3

Art Unit: 3752

7. Claim5 is rejected under 35 U.S.C. 103(a) as being unpatentable over German Patent No. DE19956830 to Gottlieb et al. in view of U.S. Patent No. 4,583,687 to Gaskell.

8. The rejection of claim 1 above serves as the basis for the following. Gottlieb et al does not teach a tapered guide hole. Gaskell teaches a tapered surface (11a) of a guide hole for a nozzle member (17). It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the injector of Gottlieb et al with the tapered guide wall as taught by Gaskell in order to supply a tapered valve needle with a corresponding surface.

Conclusion

- 9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure is as follows
 - U.S. Patent No. 7,367,517 to Tojo et al
 - U.S. Patent Application No. 2004/0124286 to Schorr et al
 - U.S. Patent No. 7066397 to Astachow et al

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JAMES S. HOGAN whose telephone number is (571)272-4902. The examiner can normally be reached on Mon-Fri, 6:00a-3:00p EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Len Tran can be reached on (571)272-1184. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
